I am a researcher mainly interested in human behaviour, and more recently quantitative methods and reproducible science.

About me

I am an Associate Professor and Researcher at the [Human Behaviour Lab \(LACH\)](#), Faculty of Psychology, at [Universidad El Bosque](#) in Bogota, Colombia. My research interests include mate choice and human vocal communication, with an aspiration towards understanding musicality. I am also interested in bioacoustics and psychoacoustics, as well as hormonal effects on human behaviour. I published among the first articles showing within-individual changes in voice pitch in response to the social status of the listener, and have demonstrated strong effects of voice modulation on listeners in courtship contexts. I am very passionate about quantitative methods and R programming, as a tool to promote reproducibility and open science.

Skills

Data Science	R (advanced: all data wrangling, analysis, plots and tables, and even this CV made in R)
Reproducible Report	Markdown/Rmarkdown
Quantitative Research	General and Generalised Linear Models, Mixed Effects Models, PCA
Software	R, RStudio, Praat, Audacity, InkScape, Zotero, OBS Studio, Blender
Languages	English/Spanish (native)

Education

PhD - Psychology	Stirling, UK
UNIVERSITY OF STIRLING - SCHOOL OF NATURAL SCIENCES	2014
