I am a scientist mainly interested in human behaviour, as well as quantitative methods, and reproducible science.

About me

I am an Associate Professor and Researcher at the Human Behaviour Lab (LACH), Faculty of Psychology, at Universidad El Bosque in Bogota, Colombia. My research interests include mate choice and human vocal communication, with an aspiration towards understanding musicality. I am also interested in hormonal effects on human behaviour. I published among the first articles showing within-individual changes in voice pitch in response to the social status of the listener, and have demonstrated strong effects of voice modulation on listeners in courtship contexts. I am very passionate about quantitative methods and R programming, as a tool to promote reproducibility and open science.

Skills

Data Science R (advanced: all data wrangling, analysis, plots and tables -and even this CV- made in R)

Reproducible Report Markdown/Rmarkdown (including LATEX)

Quantitative Research General and Generalised Linear Models, Mixed Effects Models, PCA

Software R, RStudio, Praat, Audacity, InkScape, Zotero, OBS Studio, Blender
